

## A SINGLE SOURCE SOLUTION WITH VALUE

D-Liquefy is an optimization service designed to promote value of our offering for gas well optimization using foamers. Our service offers something no other company currently provides.

The value of D-Liquefy is that we can create a turn-key solution for identifying, testing, trialing, implementing and proving foamer well optimization programs.

## PROGRAM SERVICES SUPPLIED

- Best in class foamers – Foamers capable of foaming up to 75% condensate – water ratios
- Foamer test trailers – Trial a program before investing in infrastructure
- Well batching equipment – Batch wells to qualify foamer performance or perform regular well batching
- Optimization tools – Fluid levels, pressure surveys to evaluate and qualify wells
- Field foamer testing
- Local lab foamer testing
- Nalco unload computer modeling
- Technical training
- Lab demonstrations
- Foamer pumping system supply and installation

Typically to implement such a program would require the assistance of four or more service companies:

1. Optimization company does fluid shot and pressure survey
2. Chemical company supplies foamer
3. Pressure truck batches well
4. Supply company provides tank and pump
5. Crew truck delivers and installs pump and tank
6. E&I company ties in pump to well

Stimulate's goal is to offer producers a consolidated list of services that encompasses the entire program from start to finish.

## BENEFITS OF D-LIQUEFY PRODUCTION ENHANCEMENT

The benefits of offering this service as a turn-key solution are numerous:

- Cost Savings with fewer suppliers
- Less management / Simpler process
- More accountability on the service provider
